CHAKRAY

BRAND GUIDELINES

Version 2 - 2021

OUR HISTORY

Chakray was born as a small group of engineers with wide experience in technology consulting sector, who wanted to start a new company where they themselves would like to work and to be proud of.

Looking for a name for the company, as some of the people in Chakray founding group were Peruvian, the word Chakray came.

Being a Quechua term (Quechua is the language of the Incas, a pre-Columbian culture in Peru), the concept behind was very powerful, which could be used to connote the company value and above all, to tell a story.

Chakray: know how to make “chacra” (farm); know how to work (word closer to the Andean concept of technology)

1.0 LOGO

LOGO HISTORY

The exploration for graphics was based on related concepts, and the most interesting idea was “andenes”: platforms of stepped irrigation systems built in the mountains. And specifically the circular andenes in Moray (Cusco).

The graphic part of the logo was inspired by these forms, to be charged of name story and company value. Visual messages tried to reach were Simplicity, Community and Union, Organic and Fluid Movement, Focus.

The red color was used to symbolize the passion and energy for what is done in Chakray, with terra-hue as approach to an ancient-like feeling.

The typography was selected as counterpoint from the icon: straight lines and rounded corners, minimalistic and sans serif, symbols/”techie” appearance, as an alien-alphabet.

This colour combination of the Chakray logo should only be used on dark backgrounds.

This version may be used on image backgrounds only if they have a minimum of 50% opacity #000000 overlay. Any less than this a single colour logo should be used as described on page 7.

This colour combination of the Chakray logo should only be used on light backgrounds.

The full colour logo should never be used on a red background.

CHAKRAY
THE WSO2 SPECIALISTS

CHAKRAY
THE WSO2 SPECIALISTS

SINGLE COLOUR LOGOS

When the full colour logo is not appropriate to use, one of the following single colour logos may be used in it's place.

On light backgrounds please ensure the single colour logo is #49494a.

On dark or coloured backgrounds, especially red please use the Chakray logo in #FFFFFF full opacity.

When using the Chakray logo on an image background with a black overlay less than 50% you should use a full opacity #FFFFFF logo. However, the Chakray logo should never be used on an image with a less than 20% overlay. This is to ensure the logo is visible.

Light background
Logo colour: #49494a

Dark or coloured background
Logo colour: #FFFFFF

Image background
Logo colour: #FFFFFF
Overlay: Minimum 20% opacity #000000

LOGO SPACING

Spacing is important for any logo. To make sure the Chakray logo has enough space around it at all times please use the 'C' from the logo as a guide.

After altering the Chakray logo to the desired size, copy the 'C' from the logo and rotate it around the logo as in the diagram. Draw a box around this space. If nothing else comes in to contact with the box then the space is correct.

MINIMUM SIZE

It is important that the Chakray logo remains clear at all times. This is why we do have a minimum size the logo can be.

Please follow the guidelines set out in the diagrams for the logo with and without the strapline.

Minimum print size is 30mm wide
Minimum digital size is 130px wide

Minimum print size is 60mm wide
Minimum digital size is 180px wide

LOGO ICON

Can be used instead of the logo when there is limited room for the full logo or on printed documents such as brochures when the full logo has been used on the front page of the document.

The logo icon should only be used in chakray red (details on page 20) on lighter backgrounds or white on darker backgrounds.

Minimum print size is 10mm wide
Minimum digital size is 40px wide

WATERMARK

The logo icon is primarily used as a watermark to add texture to plain backgrounds.

The positioning of the watermark should always be cut off the page on the right. You can either choose to position the logo in the bottom right hand corner with the logo icon cut off or you can cut off only the right side of the logo icon as shown in the examples.

When using the watermark you need to be mindful of what colour background it is being used on.

Light backgrounds
#000000
4% opacity

Dark backgrounds
#FFFFFF
5% opacity

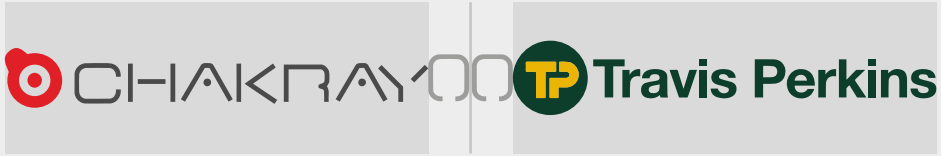
Coloured or Image backgrounds
#FFFFFF
10% opacity

LOGO WITH PARTNER/CLIENT LOGOS

When the Chakray logo needs to be used along side a partner or client logo you shoudl try to follow these guidelines providing the partner or client involved do not have contridicting brand guidelines.

For this example we have used a rectangle of 56mm x 20mm. Each logo should either fill the width or the height of the rectangle.

Please ensure you use the same aspect ratio of the rectangle for other sizes.



INCORRECT USAGE

It is essential that our logo remains consistent across all media.

Please follow these rules to make sure no changes are made to our logo.

Do not stretch or warp the logo

Do not alter the colours of the logo

Do not rotate the logo

Do not change the scale of the icon in the logo

Do not change the logo typeface

Do not delete the logo icon

2.0 TYPOGRAPHY

FONT USE

Proxima Nova Bold is the primary font for heading/title use. It can also be used for subheadings. When using Proxima Nova Bold please ensure it is capitalised to make sure it matches the current marketing material.

Roboto Light is primarily used for body text.

PROXIMA NOVA BOLD

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!?

Roboto Light

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!?

SECONDARY FONT USE

Roboto Medium is used for secondary subheadings.

Roboto Regular can be used as a secondary body text if Roboto Light isn't suitable.

Proxima Nova Semibold is used primarily online as the button text on the chakray.com website. However you may also use this font in print if another style of secondary subheading is needed.

Roboto Medium

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!?

Roboto Regular

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!?

Proxima Nova Semibold

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890!?

#CCCCCC
C23 M17 Y18 K1
R204 G204 B204

SMOKEY WHITE

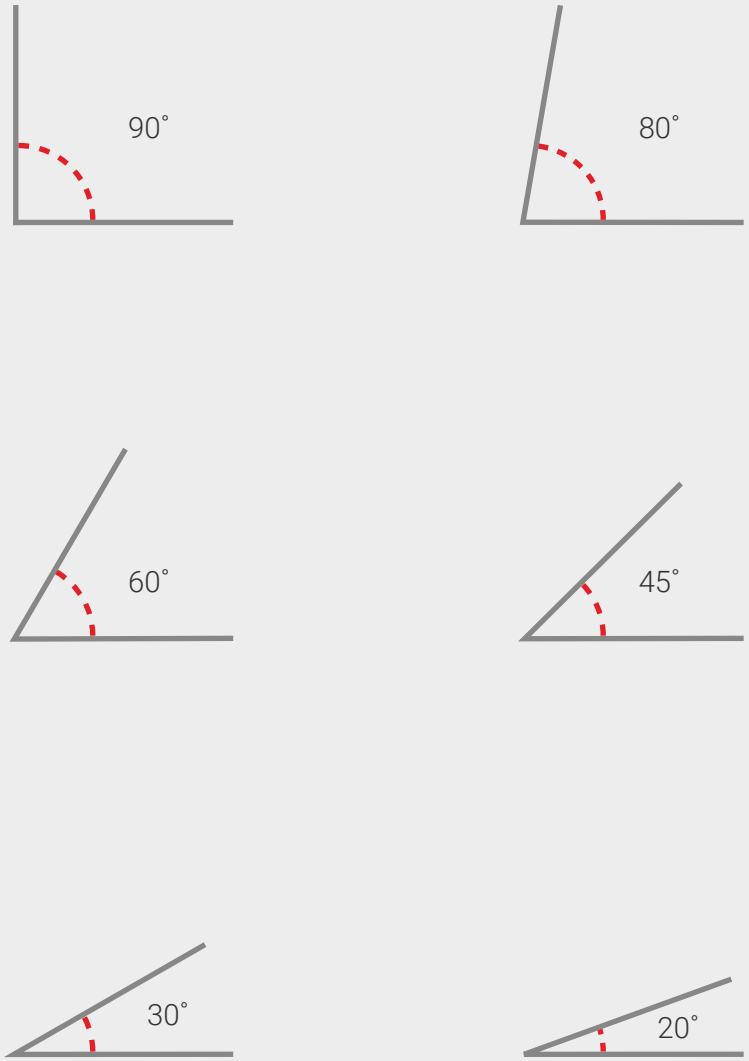
#EDEDED
C8 M6 Y7 K0
R237 G237 B237

4.0 DIAGONALS

DIAGONAL ANGLES

As part of our branding diagonal shapes are often used to hold images and add interest to the page whether it be presentation, printed proposal or webpage.

We want to make sure all of these shapes are consistent to one another. That is why we have created these angles to show what is acceptable to be used along side our branding.



HOW TO USE DIAGONALS

Any 2 of the diagonals can be used at one time. In this example there is a 30˚ angle and a 20˚ angle. These shapes should always be different colours to one another either being coloured image and red image or black and white image with a red image.

Only 2 shapes should be used on one page at one time.

5.0 PHOTOGRAPHY

PHOTOGRAPHY

Office based, computer lifestyle photography is mainly used across the website and other brand material.

There is a bank of imagery that has been taken at the Chakray Seville office. This should be used above any stock photography. If the photography isn't appropriate then stock photography in this style may be used.

LOCATION PHOTOGRAPHY

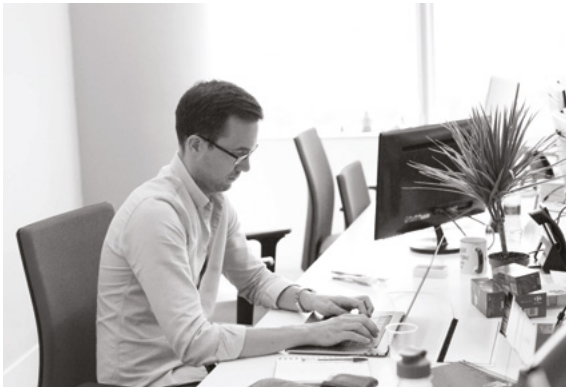
Location photography is primarily used in print material as title pages or section dividers.

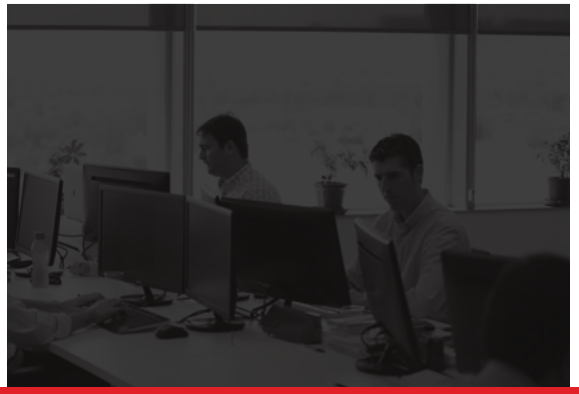
We use big city locations to emphasize our worldwide connections.

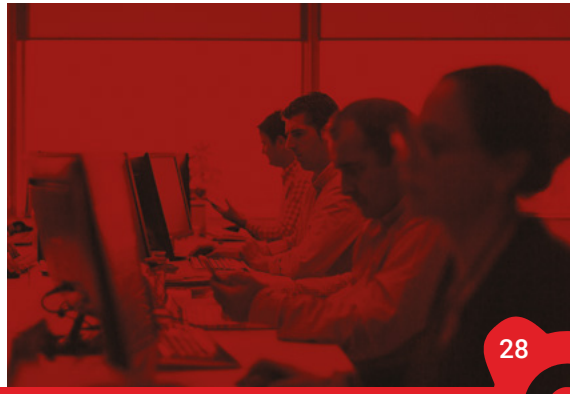
PHOTOGRAPHY STYLE

Images for chakray should follow these rules.

1. Full Colour images
2. Full Colour dark overlay images - 70% #111111 overlay
3. Black and white images
4. Black and white faded images - 90% #FFFFFF overlay
5. Black and white grey images - 80% #878787 overlay
6. Light grey images - 80% #CCCCCC overlay
7. Black and white dark images - 80% #111111 overlay
8. Red overlay - B&W image multiplied on top of a 'Chakray Red' (please see pg 20) background







6.0 DIAGRAMS

DIAGRAM EXAMPLES

When designing diagrams you must ensure that they match the same style as Chakray.

Proxima Nova Bold and Roboto Light are the most commonly used for diagrams to ensure the information is shown clearly.

As shown in the example box borders are used to contain the information. Please only use solid borders or dashed line borders on diagrams.

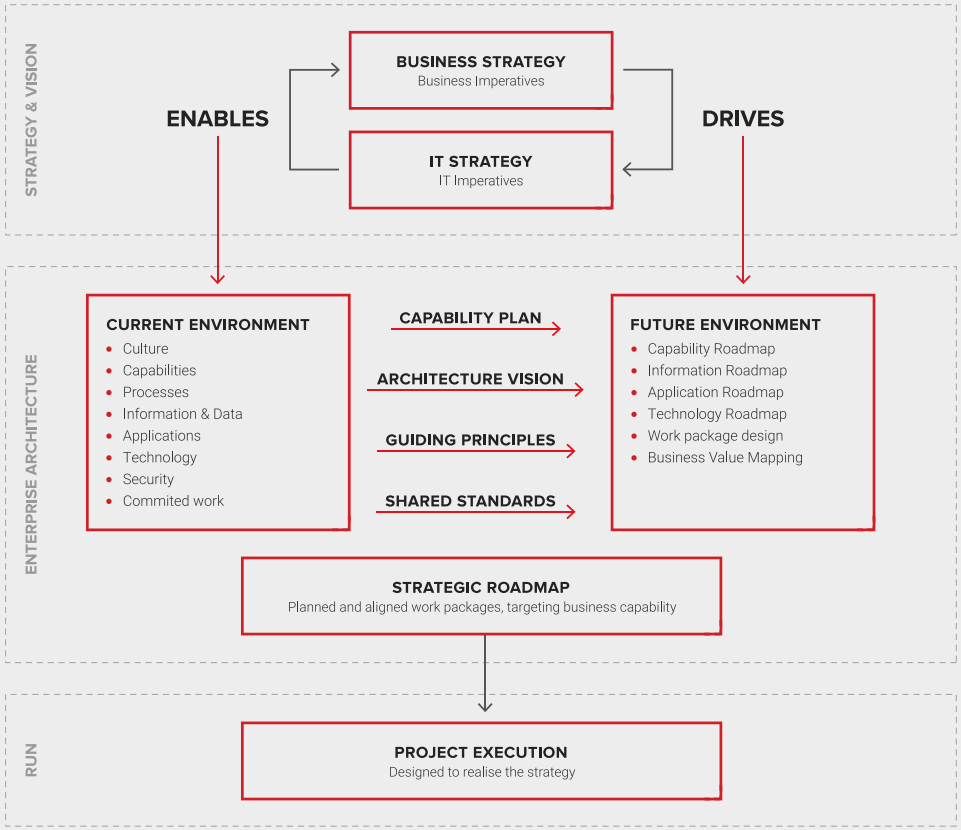


DIAGRAM COLOURS

Stroke colours

Chakray Red (#E11F26)

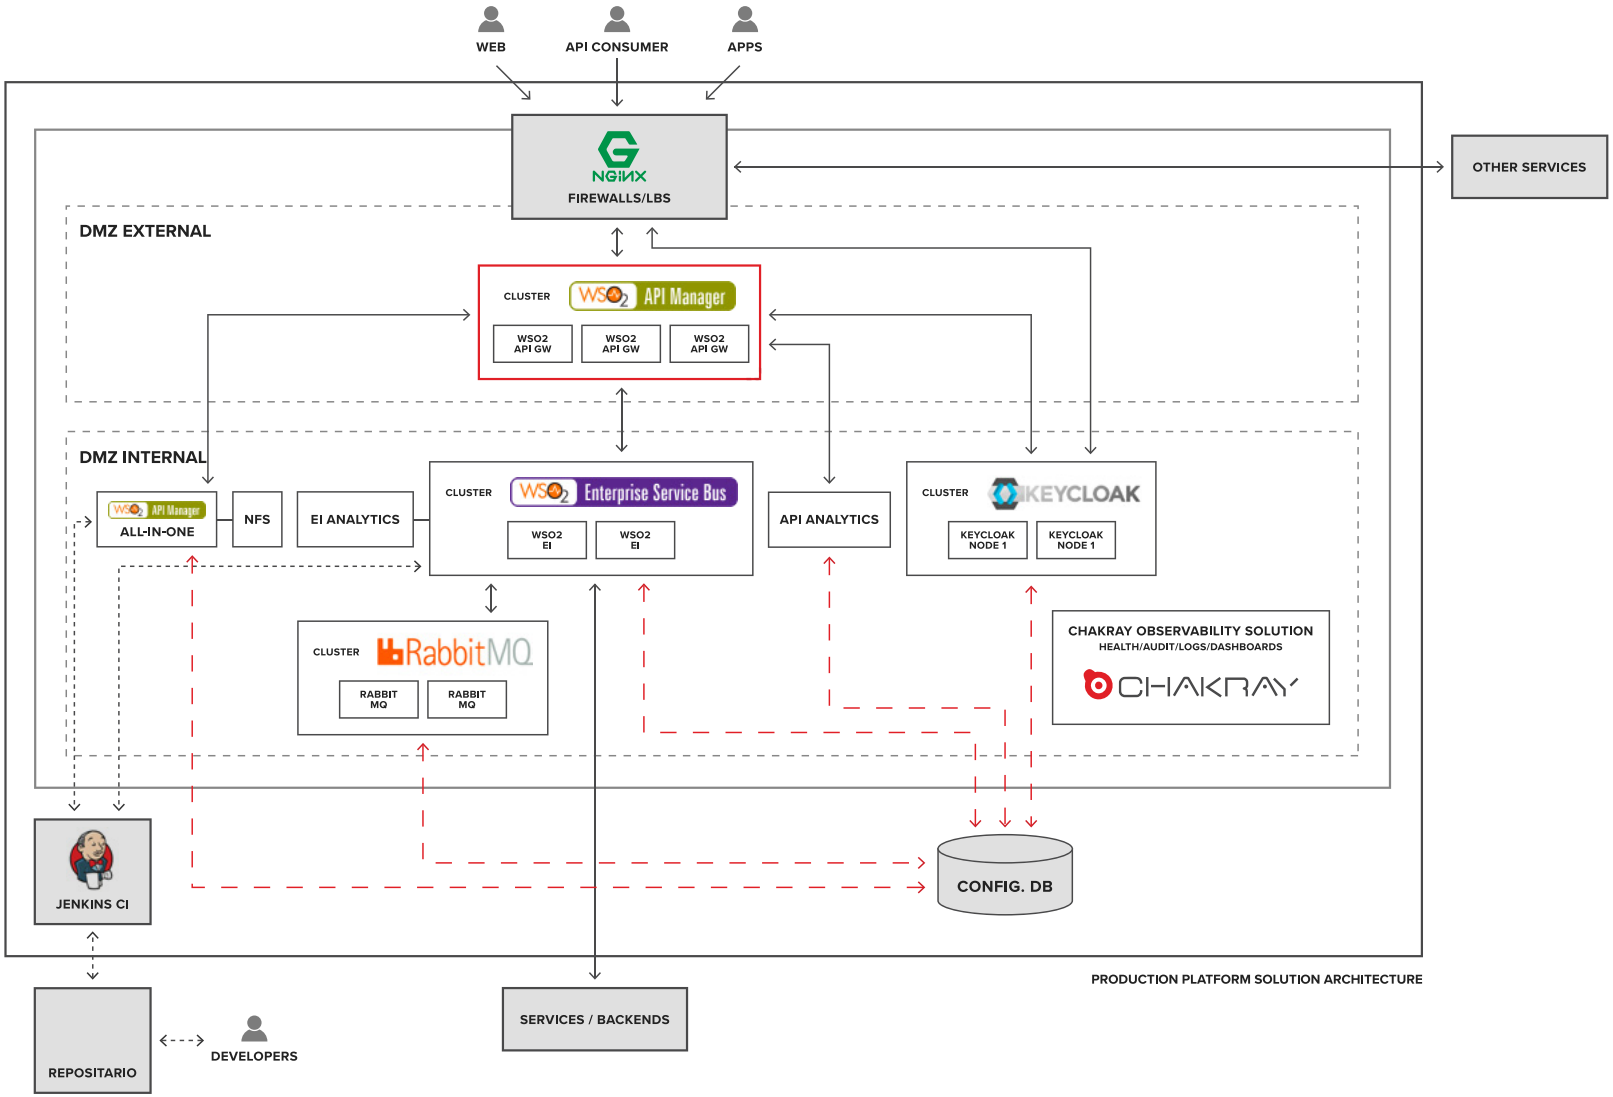
Gunmetal Grey (#878787)

Steel Grey (#49494A)

Arrow colours

Chakray Red (#E11F26)

Steel Grey (#49494A)



7.0 ICONOGRAPHY

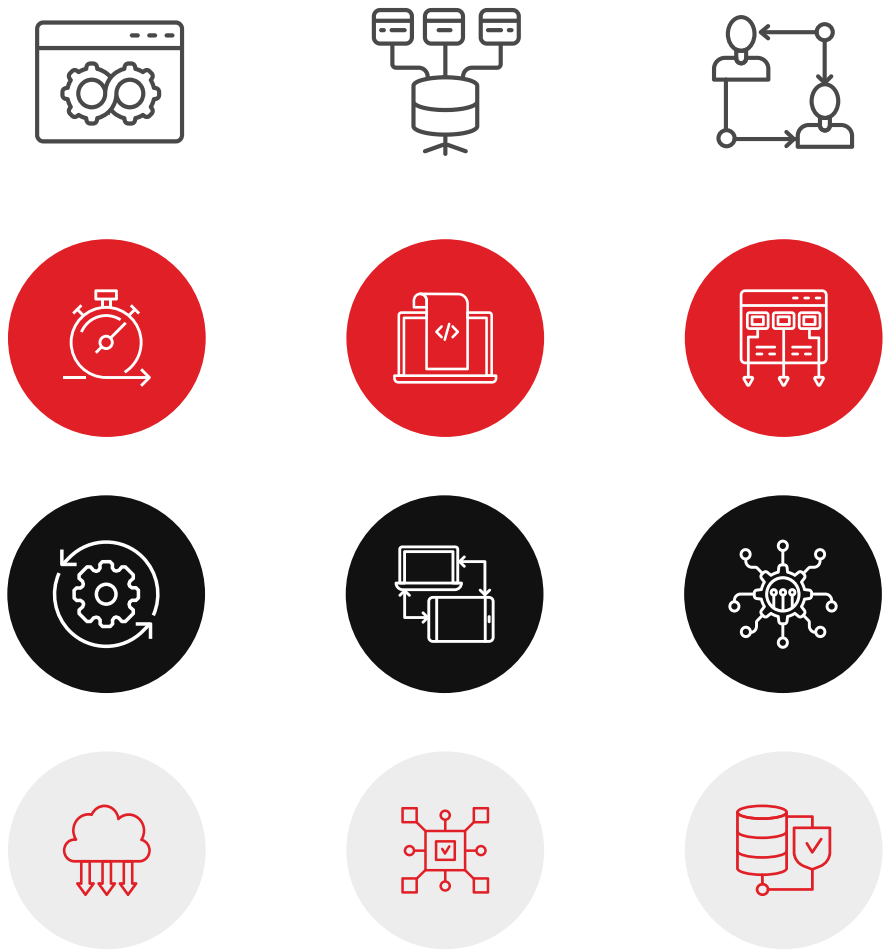
ICON STYLE

Style 1 - This style of icon is to be used if the icons don't need to neccessarily stand out but to support a bullet point or statement. These icons can have their colour changed to Midnight Black, Chakray Red or Steel Grey (details are on page 20)

Style 2 - This style is to be used when attention is needed to be drawn to the icon. The red circles can be used on dark, light or image backgrounds. However, if the background is red then you should avoid using this style.

Style 3 - This style as above can be used to draw attention to the icon. This style should only be used when the red icons are not suitable to use. For example, on a red background. Another exception of using this style is when Style 2 are being used as primary icons and Style 3 can be used as secondary icons.

Style 4 - This style can be used if the icons do not need to stand out as much as style 2 and 3 but need to attract attention. This style should only be used on a white background.



PADDING TEST

When you're using icons in a circle there needs to be enough padding to make sure the icon is clear. To test that there's enough padding scale down the circle to 70% and make sure that the full size icon still fits within it.

8.0 TABLES

TABLES

Here are two examples of different types of tables. Depending on the data needed for the table please use your best judement to decide between them or which to expand from.

PRINT

Label text - Proxima Nova Bold C0 M0 Y0 K94
Content text - Proxima Nova Regular C0 M0 Y0 K80
